CASE STUDY 1: SEAN SCOTT, VIRTUAL LAW OFFICE

HEADLINE

Invisible Expertise Now Answers Florida Families' Questions

SUBHEADLINE

An elder-law attorney whose expertise was invisible online. Now he answers the questions Florida families Google at 2 am, and ranks #1 for "estate planning."

THE CHALLENGE

Sean practices in one of the most question-heavy niches in law: Florida Medicaid eligibility, homestead exemptions for seniors, filial responsibility, Medicare nursing-home coverage, and estate planning. The families searching this are scared, time-pressed, and typing very specific questions into Google. Sean had the answers in his head and in client meetings. He did not have them ranked anywhere a stranger could find them.

THE READTOMATO SOLUTION

HotTakeEngine turned Sean's working knowledge into a library of authority articles, each mapped to a real question people search: the 2026 Florida Medicaid income cap, what happens after Medicare's first 20 days of nursing-home coverage, whether you can pull a home-equity loan on a house in a revocable trust, and the homestead exemption for seniors. Published on a steady cadence, internally linked, written to be the best answer on the page.

RESULTS (GSC verified, trailing 90 days)

- 521,000+ search impressions in 90 days
- #1 ranking for "estate planning"
- Page one for "medicaid income limits Florida" and "what is the income limit for Medicaid in Florida," the exact questions families search before a nursing-home crisis
- 14.6% of his ranking queries now surface in AI answers (Google AI Overviews and LLM results)

QUOTE - We own Florida's most important elder-law searches on AI engines."

"This is what AEO looks like. Sean owns page one for the elder law, and Medicaid questions Florida families search in a crisis, ranks #1 for 'estate planning,' and one in seven of his queries now feeds AI answers too. Over half a million impressions a quarter, from expertise that used to live only in client meetings." - GSC verified, June 2026

CASE STUDY 2: DUANE GARTMAN, FUN & MORE RENTALS

HEADLINE

Golf Cart Rentals Dominate Barrier Island Searches

SUBHEADLINE

A beach-rental shop on a barrier island, winning "golf cart rentals near me" and pulling 9,000 visitors a month.

THE CHALLENGE

Fun & More rents golf carts, beach wheelchairs, wagons, umbrellas, and the whole island-vacation kit on Anna Maria Island. The catch with a vacation business: your customers are out-of-towners researching before they arrive, asking things like "golf cart rentals near me" and "beach wheelchair rental." If you do not own those searches, a competitor greets your customer first. Duane had the inventory and the reputation. The research-stage traffic was leaking elsewhere.

THE READTOMATO SOLUTION

HotTakeEngine on a monthly cadence, aimed squarely at in-market research intent: an Anna Maria Island golf-cart-laws explainer, beach-supply rental guides, and product and category pages built to convert. The content meets the tourist at the question and leads them to the booking.

RESULTS (GA4 + GSC verified, trailing 90 days)

- 9,022 monthly sessions, 4m 37s average time on site
- Page one for "golf cart rentals near me" and "beach wheelchair rental," pure booking intent
- 77,126 impressions for "boogie board" at position #4
- 286,000+ total search impressions in 90 days

QUOTE - "We've grown to 9,000 monthly visitors that have turned into real bookings."

"Page one for 'golf cart rentals near me' is a tourist about to book. Fun & More owns those searches, pulls 9,000 sessions a month, and holds a four-and-a-half-minute average session. That last number is the tell: real vacationers reading their way to a reservation, not bounce traffic." - GA4 + GSC verified, June 2026

CASE STUDY 3: TRACY HAYES, REAL ESTATE EXCELLENCE PODCAST

HEADLINE

ReadTomato's HotTakeEngine Earned His Long-Term Trust.

SUBHEADLINE

A podcast host who tried nearly every content tool out there. ReadTomato is the one he kept.

THE CHALLENGE

Tracy hosts the Real Estate Excellence Podcast and built his brand on hours of recorded expert conversations. The problem with audio: it does not rank. Every episode was a goldmine of insight that Google and the AI answer tools could not read. Tracy tried tool after tool to turn his spoken expertise into written content that got found, and produced it himself on top of a full mortgage career. Nothing stuck, and nothing beat what he could grind out by hand.

THE READTOMATO SOLUTION

HotTakeEngine takes Tracy's podcast transcripts and turns them into search-optimized written content, same voice, same expertise, built to rank in both classic search and the AI-driven landscape his industry is moving into. He went from doing it all himself to keeping the one tool that beat his own output.

RESULTS (client-verified, public 5-star Google review, June 2026)

- Publicly called ReadTomato "the one I actually kept" after trying nearly every content tool available
- The work is "outperforming anything I was producing on my own," in his words, getting "real clicks and real reads." Left an unprompted 5-star public review on ReadTomato's Google Business Profile

QUOTE - "ReadTomato transformed my expertise into content that's in ChatGPT."

"As the host of the Real Estate Excellence Podcast, I've tried nearly every content tool out there. ReadTomato is the one I actually kept. Their HotTakeEngine transforms my podcast transcripts into blog content that gets real clicks and real reads, outperforming anything I was producing on my own. If you're a real estate agent serious about being found online, especially in this AI-driven search landscape, ReadTomato isn't optional; it's essential. They've cracked the code on turning spoken expertise into written content that ranks. Highly recommend." - Tracy Hayes, Host, Real Estate Excellence Podcast
